

New for Spring 2009

Cooperative Delivery Routes

We know our region better than anyone else, and we understand your frustrations with freight costs. Can we do something about it?

Yes, we can!

Malmborgs and Wagners are combining their resources to develop route delivery of young plants in our region. Not only will this cooperation help control shipping costs, but it will result in increased service to growers. By pooling our deliveries in a region, we increase our shipping efficiencies, freeing resources to allow better delivery coverage and committed routes. The end result: better delivery options for you!

How can you take advantage of our cooperation and get your young plants delivered to your door? First, help us pool orders as much as possible by targeting delivery weeks in cooperation with other growers along your route (see routes and dates on reverse). Second, give Wagners or Malmborgs a call if you have questions. Third, book your orders as you normally would, we'll take care of all the little details.

When we
work
together,
growers
win!
